SCHWEIZER receives EN 9100 certification

Schramberg, January 10, 2014 - Schweizer Electronic AG has been successfully audited based on EN 9100 and is a certified supplier for the aerospace industry. Thus, the company is now in the position to also supply customers of the aerospace industry with its premium and innovative PCB solutions, focussing on power electronics, embedding and system cost reduction. In avionics, too, electrification relentlessly advances and strives for the reduction of fuel, CO₂ and weight.

At the end of last year, SCHWEIZER also successfully passed audits based on ISO 14001 „Environmental Management“, ISO 50001 „Energy Management“ and re-certification based on ISO/TS 16949 „Automotive“.

Thus the company performed four audits in 2013, among them three first-time certifications, which were all passed successfully. All certifications have been incorporated into an integrated management system.

„By obtaining certificates we have independent parties confirm that our products are manufactured based on internationally determined quality standards and that – related to environment, labour and health protection - we do more than required by law“, stresses Nicolas Schweizer, Chief Commercial Officer of Schweizer Electronic AG. „This is a clear confirmation for our customers that the company continues to be a partner with profound know-how and recognized quality for our established client base and new customers.“

About Schweizer:

Schweizer Electronic AG is a global best-in-class technology company, manufacturing premium PCBs and innovative solutions for automotive, solar and industry electronics as well as avionics. Based on recognized technology and consultancy competencies, SCHWEIZER's products and systems address central challenges in the areas of Power Electronics, Embedding and System Cost Reduction and are characterized by energy and environmentally friendly features. Together with its partners Elekonta Marek GmbH & Co. KG and Meiko Electronics Co. Ltd., the company offers in its division PCB cost and production optimised solutions for small, medium and large series and within this network employs more than 11,000 people in Germany, Japan, China and Vietnam.
