NEW SCHWEIZER 2021 – MORE THAN PCBs

Ultra-modern PCB production sites in Schramberg in the Black Forest and in Jintan in China along with close partnerships with other technological innovators offers a global access to quality PCBs ranging from standard solutions to customer-specific designs. For almost any need and lot size – with maximum cost-effectiveness.

					
INNOVATIVE	RELIABLE	GLOBAL & LOCAL	TECHNOLOGY SCOPE	INDUSTRY 4.0	COMPETITIVE
Excellence in state-of-the-art technology & System Know-How with outstanding track record in Automotive for decades	Supply Chain Security even if international Supply Chains are interrupted by biggest PCB fab in Europe	Highly experienced Regional Sales teams & Engineering Services	From standard to highly sophisticated technologies	Highly automated production with scalable concept in China with volume potential up to 8,000 sqm/day (group)	Extremely competitive new fab in China with PCBs at highest Quality Standards

SALES DEVELOPMENT (in mill. EUR)

THE MARKET

According to the forecast, the global PCB market generated sales of USD 74 billion in 2020. 93% of the production was attributed to Asia, 56% of which was attributed to China. With a production volume of USD 800 million, Germany's market share was only 1%. After a decline in recent years, current forecasts predict market growth again in the medium term. The estimates for the automotive sector, which recently contracted sharply, are also positive. However, with regards to global sales markets, the PCB market continues to be dominated by the 3 big "C's" (computing, communication, consumer). Source: N.T. Information Ltd.
