Equity Ratio (in %)	28.5	-5.5	5.3

1) Adjusted for Chinese subsidiary and deconsolidation

OUTLOOK

The development for 2023 is difficult to assess due to the geopolitical situation. Despite the very high order backlog, there is a great deal of uncertainty. Taking into account the currently known opportunities and risks, the Executive Board expects further sales growth of between 2 and 3 percent for 2023. The adjusted¹⁾ EBITDA ratio is expected to be between 7 and 9 percent.

SCHWEIZER – MORE THAN PCBs

Ultra-modern PCB production sites in Schramberg in the Black Forest and in Jintan in China along with close partnerships with other technological innovators offers a global access to quality PCBs ranging from standard solutions to customer-specific designs. For almost any need and lot size – with maximum cost-effectiveness.

					
INNOVATIVE	RELIABLE	GLOBAL & LOCAL	TECHNOLOGY SCOPE	INDUSTRY 4.0	COMPETITIVE
Excellence in state-of-the-art technology & System Know-How with outstanding track record in Automotive and Industry for decades	Supply Chain Security even if international Supply Chains are interrupted by biggest PCB fab in Europe and a unique partner network	Highly experienced Global and Local Sales Teams & Engineering Services	From standard to highly sophisticated and proprietary technologies	Highly automated Joint Venture production with scalable concept in China with volume potential up to 8,400 sqm/day (Group)	Competitive supply due to integrated production in our own Fab, Production Joint Venture in China and Partner Network in Asia

SALES DEVELOPMENT (in mill. EUR)

THE MARKET

The global production volume of printed circuit boards was around USD 78.6 billion in 2022 (2021: around USD 77.4 billion) – an increase of around 1.5 percent. Current forecasts assume annual growth rates in the mid-single-digit range until 2027.
